STEEL
Light

SIMPLE BUT ALWAYS STRONG

Brevetti Stendalto is proud to announce the development of the “L” series steel chains. Fully designed by the internal R&D team, **these chains are particularly robust, and different from previous versions due to a considerable decrease in weight and components.** These changes have been introduced without prejudice to the self-supporting capacity and the long-term reliability of the chains. They can be fitted with **special skids which allow smooth and precise sliding, making them an optimal solution for long-stroke applications.** The “L” series chains meet the most demanding requirements in terms of internal capacity, load strength, and ability to perform under the most challenging environmental conditions.

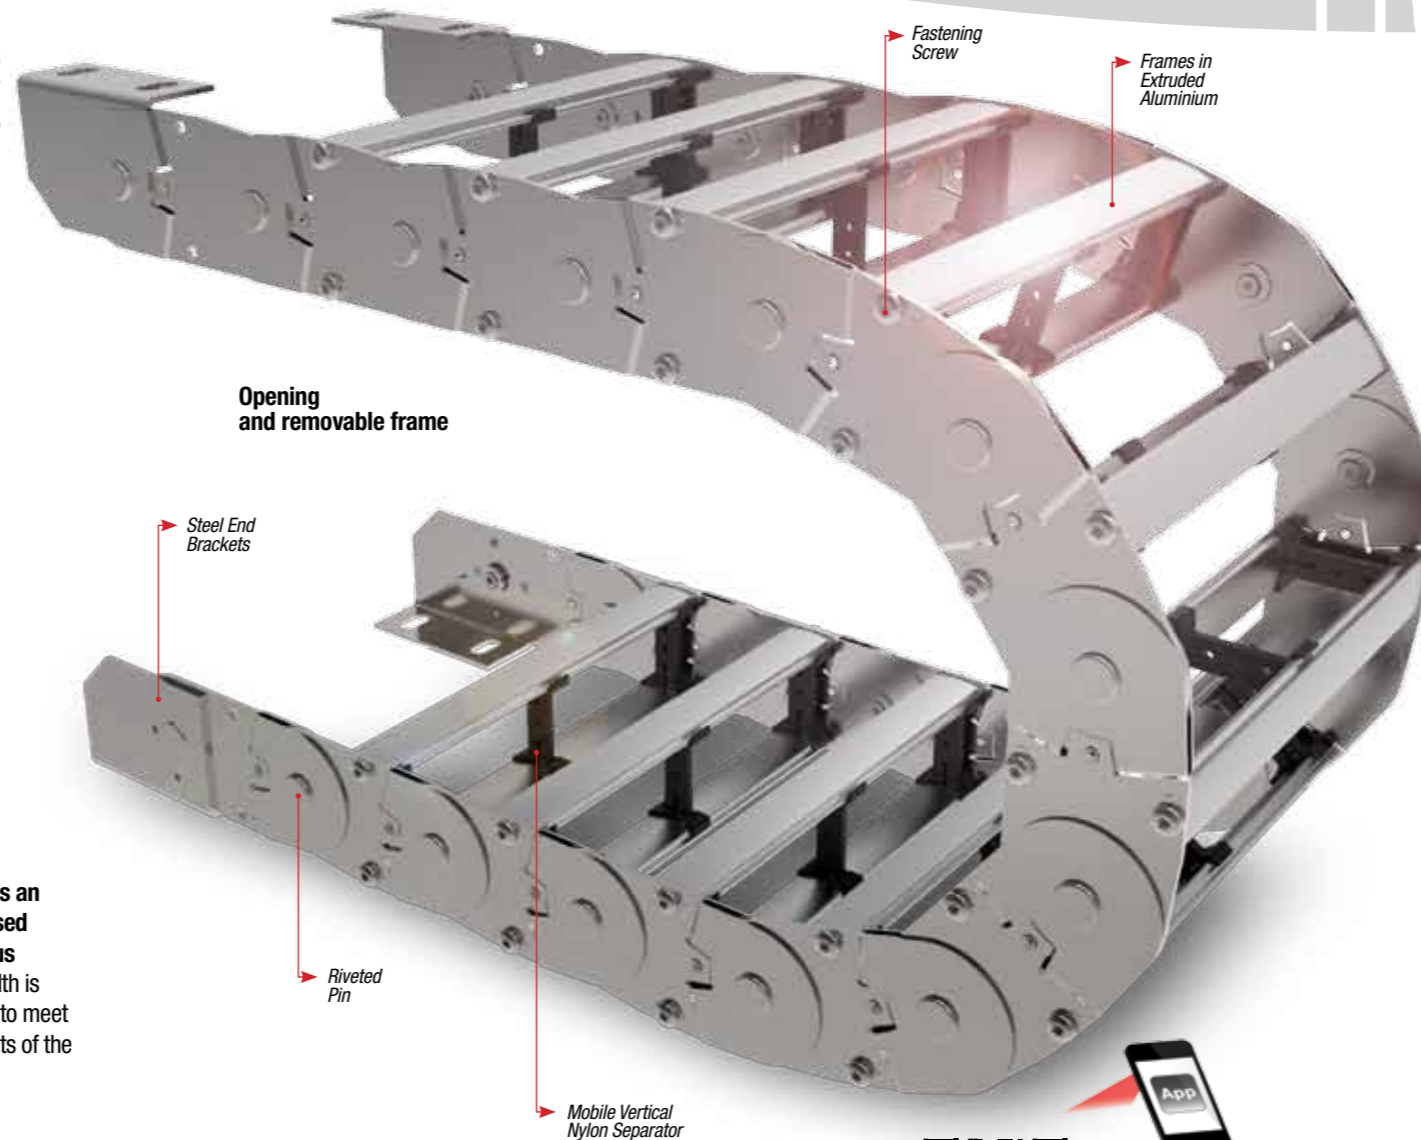

TYPE	W		C		D mm	Pitch mm	Radius	
	from mm	to mm	from mm	to mm			from mm	to mm
20LT-LB-LC	111	336	79	304	32	75	75	305
30LT-LB-LC	140	540	106	506	52	95	150	535
35LT-LB-LC	148	548	104	504	65	125	200	600
40LT-LB-LC	208	558	150	500	112,5	180	250	850

The “L” series is available as an open chain, or totally enclosed for applications in hazardous environments. The chain width is fully customisable to meet the requirements of the customer.

SELF-SUPPORTING

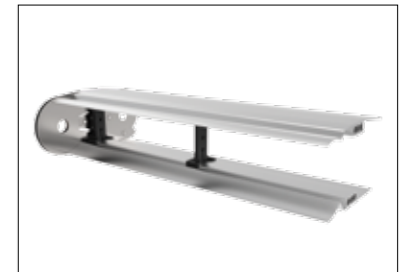

DYNAMIC CABLE PROTECTION

The “L” series is available in four versions and offering several configurations: open with steel rods, fully enclosed with aluminium covers, aluminium drawplates and customised crosspieces. Thanks to many types of spacers and separators, Brevetti Stendalto offers endless possibilities to customise the interior layout.
